

Steps

1. On the server desktop, **double-click** “Lightyear” icon.

Wait for Lightyear to fully open. (login)

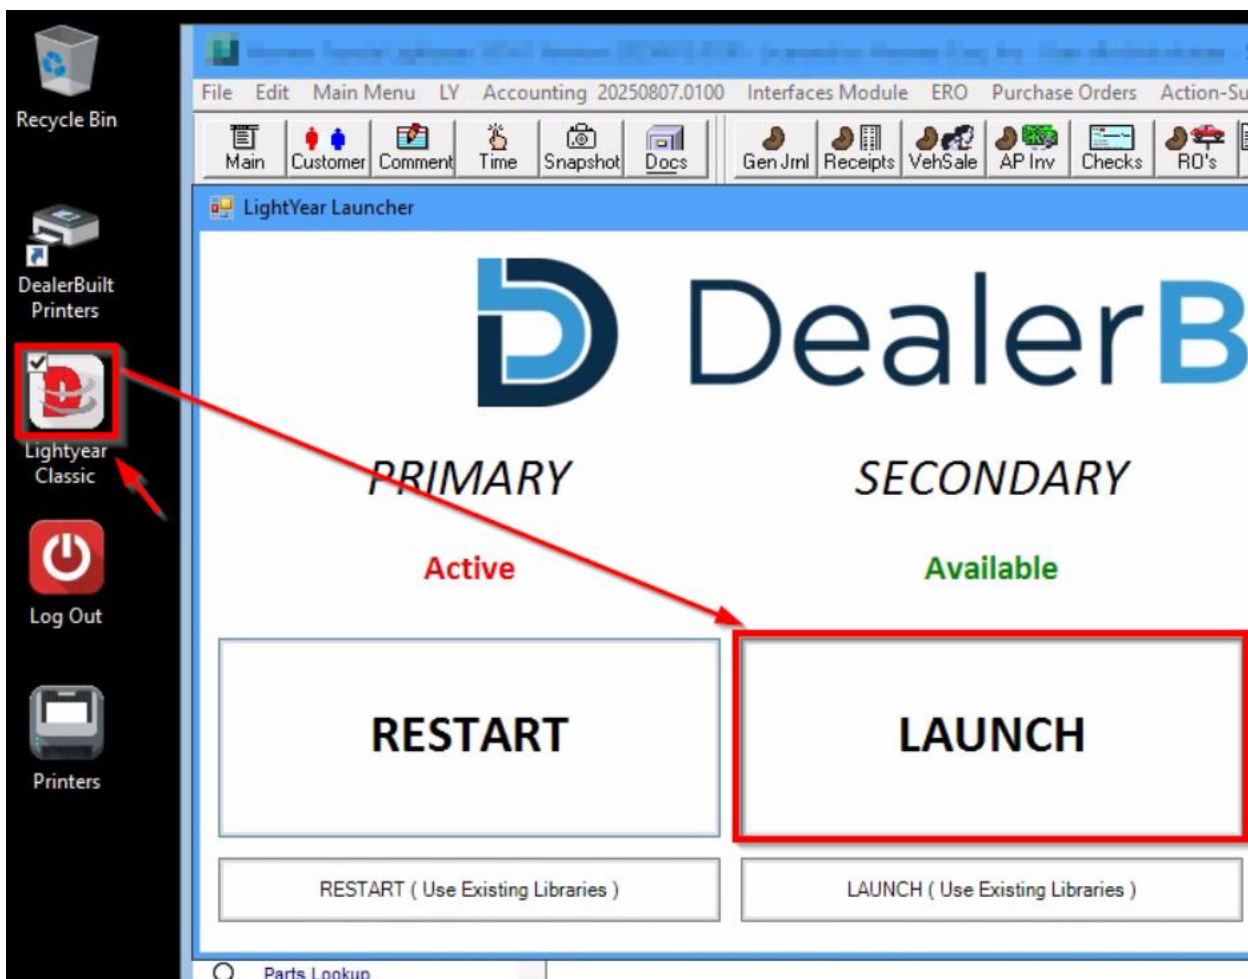

2. **Minimize** the Lightyear window.

3. On the Dealerbuilt desktop, **double-click** “Lightyear” again.

The **Lightyear Launcher** window appears.

4. In the Launcher, confirm you see:
 - a. **PRIMARY** status: **Active**
 - b. **SECONDARY** status: **Available**
5. Click **LAUNCH** under **SECONDARY**. (This starts a second Lightyear instance)

6. When prompted, **log in** again

Welcome to Lightyear.

User Name

Password

PLEASE NOTE: Passwords can now include lowercase letters.

Location

You can use the **same user account**. Multiple concurrent logins are allowed.

7. Arrange the two Lightyear windows as needed.

You should see two Lightyear icons on the taskbar which you select between.
