

Lightyear Beta Release Notes

5.26.26

Parts & Service – ERC

Fixes:

- In the Counter ticket window, the Purchase Order icon now turns yellow after creating a Purchase Order from a Counter Ticket
- ADMI report Off Shelf Fill % now calculates correctly; in-stock parts with on-hand quantity no longer report as 0 off shelf
- Skill code, when using Intelligent Dispatching, is now automatically populated when an approved estimate job is applied to a Repair Order as a new job line
- Stellantis warranty type MOPAR or “M” will now transmit to Stellantis
- The Stellantis eVIP report now pulls in the current mileage from the repair order
- Ford Request Claim Reconciliation Information report now opens from the Warranty Claim Window
- When inserting Stellantis Warranty transactions and the Warranty Account is controlled by VIN6, the VIN6 will be entered into the control field and not the Repair Order number

Accounting – ERC

Fixes:

- Vehicle Sales accounting lines cursor now automatically moves to the Account field after confirming the accounting date
